

VANTAGETRUSTSM

VantageTrustSM is an enhanced level of panoramic x-ray support, available only for the Progeny VantageTM Digital Panoramic System. As an ongoing remote support and training service, VantageTrustSM helps to ensure your practice makes the most of its Vantage panoramic system.

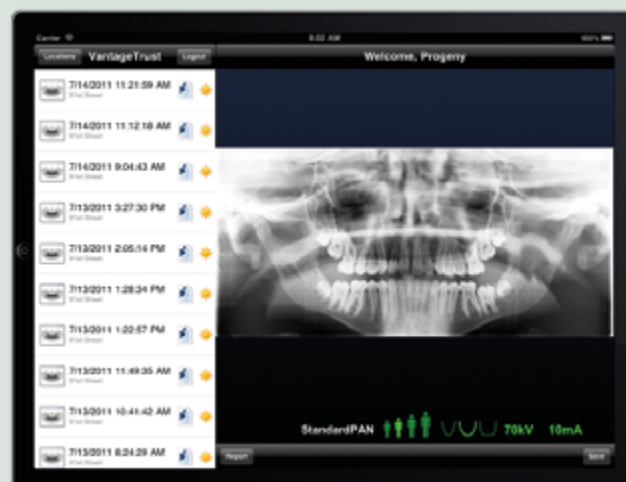

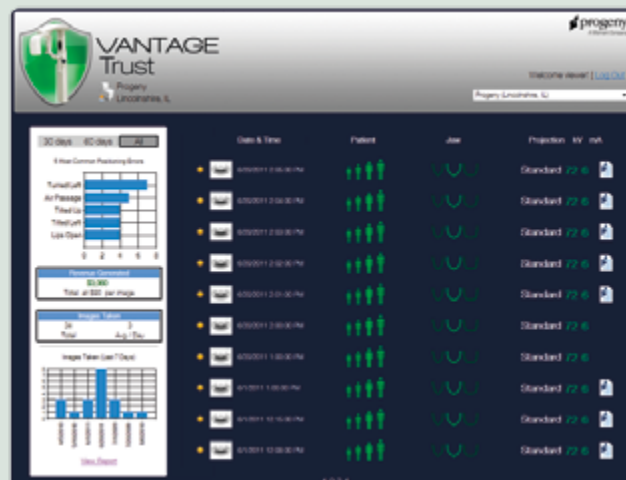

VantageTrustSM goes beyond a one-time, in-office training session to support the clinical staff and ensure the Vantage panoramic system is being used properly and effectively.

VantageTrustSM is a service consisting of ongoing remote support and training. Once a practice becomes a VantageTrustSM participant, all panoramic images are sent to Progeny along with the date and time the image was taken. No patient information is collected. Feedback is then offered to the practice regarding patient positioning and tips for improving image capture.

VantageTrustSM is simple to set up and easy to use - it comes installed and ready to use on the Vantage workstation. Select the "Activate VantageTrust" icon from the desktop to step through the activation process. Once complete, your panoramic images will be automatically forwarded to the VantageTrustSM system. Login to progenyvantage.com to review summary data, images and patient positioning feedback reports.

After sale support is an important contributor to a positive new equipment experience. That is why Progeny offers VantageTrustSM at no charge for the first 60 days*.

Make the most of your investment in digital panoramic technology. Choose the Progeny VantageTM panoramic system and the continual support of VantageTrustSM.

*The 60 day free trial begins at activation. After the initial 60 day period, VantageTrustSM is available for a nominal monthly fee. An internet connection is required for activation and use of VantageTrustSM.
